# E R A S M U S +

Hi, I'm from a small town from Romania named Resita. Both of my parents come from Resita-Romania. My mother's name is Loredana and she was born in Resita in 1976. She is now 39. She has one younger sister named Linda who is 35 years old. My grandfather on my mother's side comes from Bucharest. He is now 64 years old and he lives in Resita now. My grandmother on my mother's side comes from Constantin Daicovicu. She is 59 years old and now she lives in Resita. My grandfather was a policeman and my grandmother was working in a purse and belts factory. They were neighbors in the same building since they were kids until they grew up and fell in love. But after 25 years they divorced. My grandfather on my father's side comes from Unimat. He is 81 years old and he lives now in Resita. My grandmother on my father's side comes from Comoraste. She is 76 years old and she lives now in Resita. My grandfather worked in an iron factory and my grandmother was a casnic. They met in Resita and they are still together. My father and my mother met for the first time in a gym in my town. First they were friends, then they became closer and they fell in love. They got married and 4 years later I was born. After 18 years together they divorced. Two years after they divorced my mother met her new love and because he was living in Spain we decided to move to Barcelona.

I'm almost 16! Sometimes I'm happy, sometimes I miss all my friends and all my family from Romania. Now, I'm doing my best to study as much as I can to get good marks so I can have a good future for me and the perfect family that I'm dreaming about. I want to make sure that we will have a good and easy life because I realize that coming here is a very big opportunity for me and my family to be way more successful because in Romania there are a lot of problems with working places and very good students get to work in a bar or a supermarket because we can't offer them good work. However, Romania is a very beautiful country with a lot of potential but unfortunately a lot of stupid people are ruling it.

And in case you did not know, Dracula (the vampire) was invented in Transylvania-Romania. An Romanian king was called as a vampire because he was very cruel. So we invented vampires ;).
