

ROLANDO SÁNCHEZ LÓPEZ

My mother was born in Lima, Perú in 1960. She has four brothers that live in Lima and one more sister that lives in Tokyo, Japan. She left university to take care of the children that she had with her previous husband. After a long process of separation from her husband, she and her children moved to another city named Ica. After that she met my father, who was born in Ica in 1958 – he is now 58 years old.

My father has 5 brothers and 3 sisters. Almost all my uncles live outside Perú, just two of them are still living there. He ended up his studies of Odontology at university. After graduating, he worked for many dentists and saved money to travel to another country.

As I have already mentioned my parents met in Ica. After two years of relationship I was born and one year later they got married. In that moment they both had to take a hard decision: to move together to Barcelona to give me a better education and leave their respective lives or stay in a country with a frozen economy and more difficulties than a little and innocent baby deserve for a life he did not have the opportunity to choose. Now, the three of them are Spanish citizens and that baby is now 17 years old.
