

Team A

Case study:

Mariuca is a Romanian student and she would like to live in UK to study the flowers and the animals from the British parks and preserves. She is a student at Biology, but she is afraid she will have problems getting accustomed to the new environment, but she doesn't want to give up.

What problems can appear when she moves to UK?

Create a poster dealing with aspects related to climate, biology, physics, society and economy that appear when Mariuca emigrates to UK.

Team B

Case study:

Amira is a 40 year old Syrian woman who has to leave Syria because of the war there. She has to abandon her house and extended family there and she wants to get to France. It is not an easy decision and she has to think about all the aspects that are related to her new life in France.

What problems can appear when she moves to France?

Create a poster dealing with aspects related to climate, biology, physics, society and economy that appear when Amira emigrates to France.

Team C

Case study:

Sangen's father has been living in Germany for 2 years. He has been working in a restaurant. His first year was very difficult: far from his family in Turkey, worried about what can happen to them because he fled the country when he was persecuted, living in a country with an unknown culture and religion, with different traditions. Now he feels a little better, but he still misses his child and his country.

What problems can appear when he moved to Germany?

Create a poster dealing with aspects related to climate, biology, physics, society and economy that appear when Sangen's father emigrates to Germany.
